Urban Solutions

magourban

magourban

Magourban pone a tu disposición todo el conocimiento, experiencia e infraestructura industrial para fabricar cualquier elemento de mobiliario urbano o arquitectónico.

Magourban posa a la teva disposició tot el coneixement, experiència i infraestructura industrial per fabricar qualsevol element de mobiliari urbà o arquitectònic.

Magourban places all its knowledge, experience and infrastructures at your disposal for manufacturing any element for urban or architectural furniture.

Magourban met à votre disposition toute la connaissance, l'expérience et l'infrastructure industrielle pour fabriquer tout type d'élément de mobilier urbain ou architectural.

More than forty years

“Con más de 40 años de experiencia desarrollando soluciones avanzadas y eficientes con hormigón arquitectónico (HAC), dominamos el uso de múltiples formas y moldes para crear diseños únicos y personalizados. Además, somos pioneros en la implementación de la tecnología smart concrete (UHPC) para el desarrollo de mobiliario urbano, combinando innovación, sostenibilidad y durabilidad en cada proyecto.”

”With more than 40 years of experience in developing advanced and efficient solutions with architectural concrete (HAC), we dominate the use of multiple forms and moulds in order to create unique and customised designs. Furthermore, we are pioneers in the implementation of smart concrete technology (UHPC) for the development of urban furniture, combining innovation, sustainability and durability in every project.”

El mobiliario urbano está sujeto a las más altas exigencias, siendo pocos los materiales capaces de cumplir con los requisitos que se le exigen. Magourban fabrica elementos urbanos de alta calidad en hormigón, un material excepcional que puede resistir actos de vandalismo y uso extremo, además de requerir poco o ningún mantenimiento.

El hormigón arquitectónico (HAC) es un material fluido de fácil compactación que ofrece resultados excepcionales tanto en aspectos técnicos como estéticos y de durabilidad. Gracias a este material y a una dilatada experiencia, los fabricados de Magourban alcanzan una calidad excepcional.

El smart concrete SMC (UHPC) es un hormigón fluido de nueva generación que multiplica las capacidades resistentes del hormigón tradicional, permitiendo diseñar piezas más livianas y con secciones más reducidas que las convencionales.

The urban furniture is subject to the highest demands, few materials are able to meet these requirements. Magourban manufactures high quality urban elements in concrete, an exceptional material that can withstand vandalism acts or an extreme use, with little or no maintenance.

The architectural concrete (HAC) is a fluid material that is easy to compact and offers excellent technical and aesthetic results and durability. Due to this material and a long experience, the Magourban manufactured gets an exceptional quality.

The smart concrete SMC (UHPC) is a new generation fluid concrete that multiplies the resistance of the traditional concrete, allowing the design of lighter parts and with smaller sections than the traditional ones.

Manufacturer's Warranty

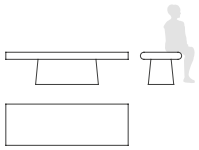

“Fabricamos mobiliario urbano de alta calidad utilizando procesos respetuosos con el medio ambiente, adaptados a las necesidades específicas de nuestros clientes. Nos comprometemos a ofrecer los más altos estándares en materiales y procesos constructivos, respaldados por una **garantía directa de fábrica**.”

El centro productivo de Magourban se encuentra en Tàrrega (Lleida), ocupando una superficie total de 40 000 m² entre naves de producción, talleres mecánicos y de moldes, almacenes exteriores y oficinas. Un cualificado equipo de profesionales se ocupa de fabricar una amplia tipología de elementos urbanos de alta calidad. Tasas de exportación superiores al 70% de la producción, confirman la excelente aceptación del mobiliario urbano de la firma Magourban en los mercados internacionales.

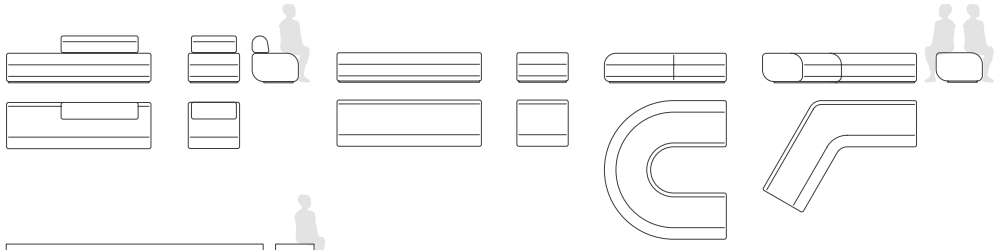

*“We produce high quality urban furniture using respectful processes with the environment, adapted to the specific needs of our customers. We are committed to offering the highest standards in materials and building processes, supported by a **direct factory warrant**.”*

Magourban production facilities are located in Tàrrega (Lleida), with a total surface of 40,000 m², including production warehouses, mechanical and mould workshops, external warehouses and offices. A qualified team of professionals is responsible for the manufacture of a wide typology of high quality urban elements. Exports, which represents more than 70% of production, confirm the excellent acceptance of Magourban urban furniture on the international market.

Pensar en el mobiliario urbano es pensar en la gente.

Cuando se construye o reforma cualquier calle, plaza, parque, etc, los ciudadanos se adaptan a lo impuesto por los profesionales del diseño y las instituciones que lo llevan a cabo. Previamente dichos ''interventores'' de los proyectos nos hemos preocupado e interesado por las necesidades y hábitos de las personas en relación al uso del espacio público ya que es en este lugar donde se establecen las relaciones con el mundo exterior, fuera del trabajo y del hogar.

Ofreciendo una amplia gama de posibilidades en cuanto a la orientación y las relaciones proxémicas, Public se ha convertido en el claro ejemplo que refleja el diseño inclusivo, para todos.

To think about urban furniture is to think about people.

When building or renovating any street, square, park, etc., citizens adapt to what is imposed by design professionals and the institutions that carry it out. However, we have been concerned and interested in the needs and habits of people in relation to the use of public space, since it is in this place where relationships are established with the outside world, outside of work and home.

Offering a wide range of possibilities in terms of orientation and proxemic relationships, Public has become the clear example that reflects inclusive design, for all.

Public

76 cm

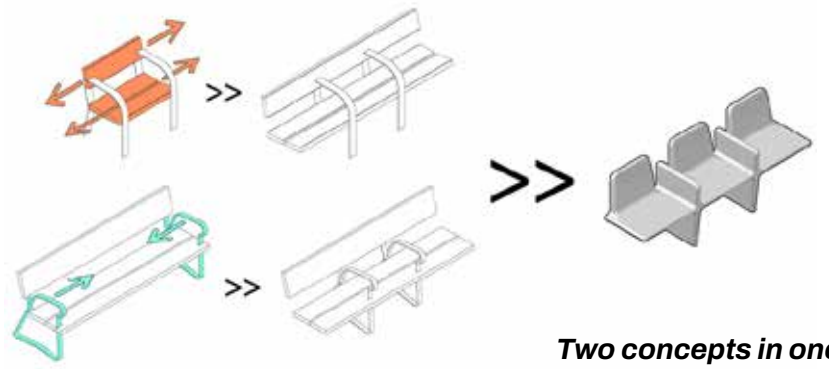

Dos conceptos en un mismo diseño.

Extender y deslizar son los dos conceptos que se han fusionado a la hora de diseñar Public, un banco de hormigón UHPC formado por dos patas o brazos centrales de los cuales se sostienen dos asientos laterales y uno central, facilitando así el uso de este último en el momento crítico de tomar asiento o levantarse, sobre todo a los sectores sensibles de la población como son los ancianos, discapacitados, embarazadas o personas con sobrepeso.

Al mismo tiempo, el hecho que los asientos laterales no estén limitados por su parte exterior permite aumentar su ancho proporcionando una mayor amplitud respecto a la plaza localizada entre apoyabrazos.

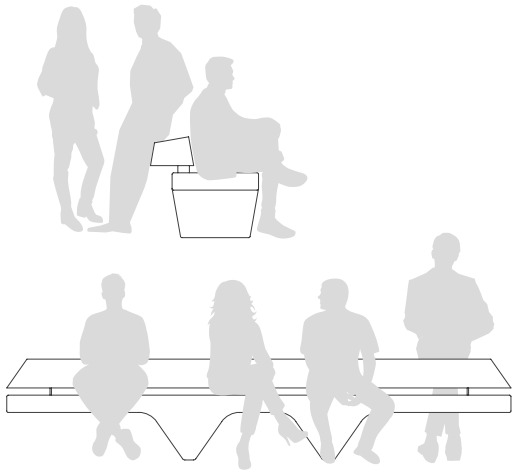

Two concepts in one design.

Extending and sliding are the two concepts that have come together in the design of Public, a bench in UHPC concrete formed by two legs or central arms that support two lateral seats and a central seat, making it easier for the latter to be used at the critical moment of sitting down or getting up, especially for sensitive population groups such as the elderly, the disabled, pregnant women or the overweight; at the same time, the fact that the lateral seats are not limited on the outside makes it possible to increase their width by providing a greater width when sitting between the armrests.

Magourban planter compatible with SMART WATERED system. Interior coating made of a two component epoxy resin with no solvents.

Jardinière Magourban, compatible avec le système SMART WATERED. Revêtement intérieur à base de résine époxy de deux composants, sans dissolvent.

2 **Depósito de agua: acumula agua a través del conducto de entrada de agua de riego.**

Dipòsit d'aigua: acumula aigua mitjançant el conducte d'entrada d'aigua de reg.

Water storage: stores water through the irrigation inlets.

Réservoir d'eau: Accumule l'eau à travers des conduits d'entrée d'eau d'irrigation.

3 **Chapa metálica galvanizada de separación entre el depósito de agua y el sustrato, apoyada sobre patas metálicas.**

Xapa metàl·lica galvanitzada de separació entre el dipòsit d'aigua i el substrat, recolzada sobre potes metàl·liques.

Galvanised metallic sheet separating the water tank and the substrate, supported with metallic legs.

Plaque métallique galvanisée de séparation entre le réservoir d'eau et le substrat, appuyée sur des pieds métalliques.

5 **Cuerdas de esparto que permiten el ascenso, por capilaridad, del agua del depósito hacia el sustrato.**

Cordes d'espart que permeten la pujada, per capil·laritat, de l'aigua del dipòsit cap al substrat.

Esparto grass ropes that allow water to rise from the tank to the substrate by capillarity.

Cordes en sparte qui permettent la montée par capillarité de l'eau du réservoir vers le substrat.

6 **Conducto de entrada de agua de riego, con tapa roscada. Marcador de bola inferior, visible desde el exterior, que mide el nivel de agua, indicando la necesidad de riego.**

Conducte d'entrada d'aigua de reg, amb tapa cargolada. Marcador de bola inferior, visible des de l'exterior, que mesura el nivell d'aigua, indicant la necessitat de reg.

Entrance conduct for irrigation water, with a screw cap. External visible dial indicator to measure the level of water and signal the need of irrigation.

Conduit d'entrée d'eau d'irrigation, avec bouchons à visse. Indicateur de boule inferieure, visible depuis l'extérieur et qui mesure le niveau d'eau en indiquant la nécessité d'irriguer.

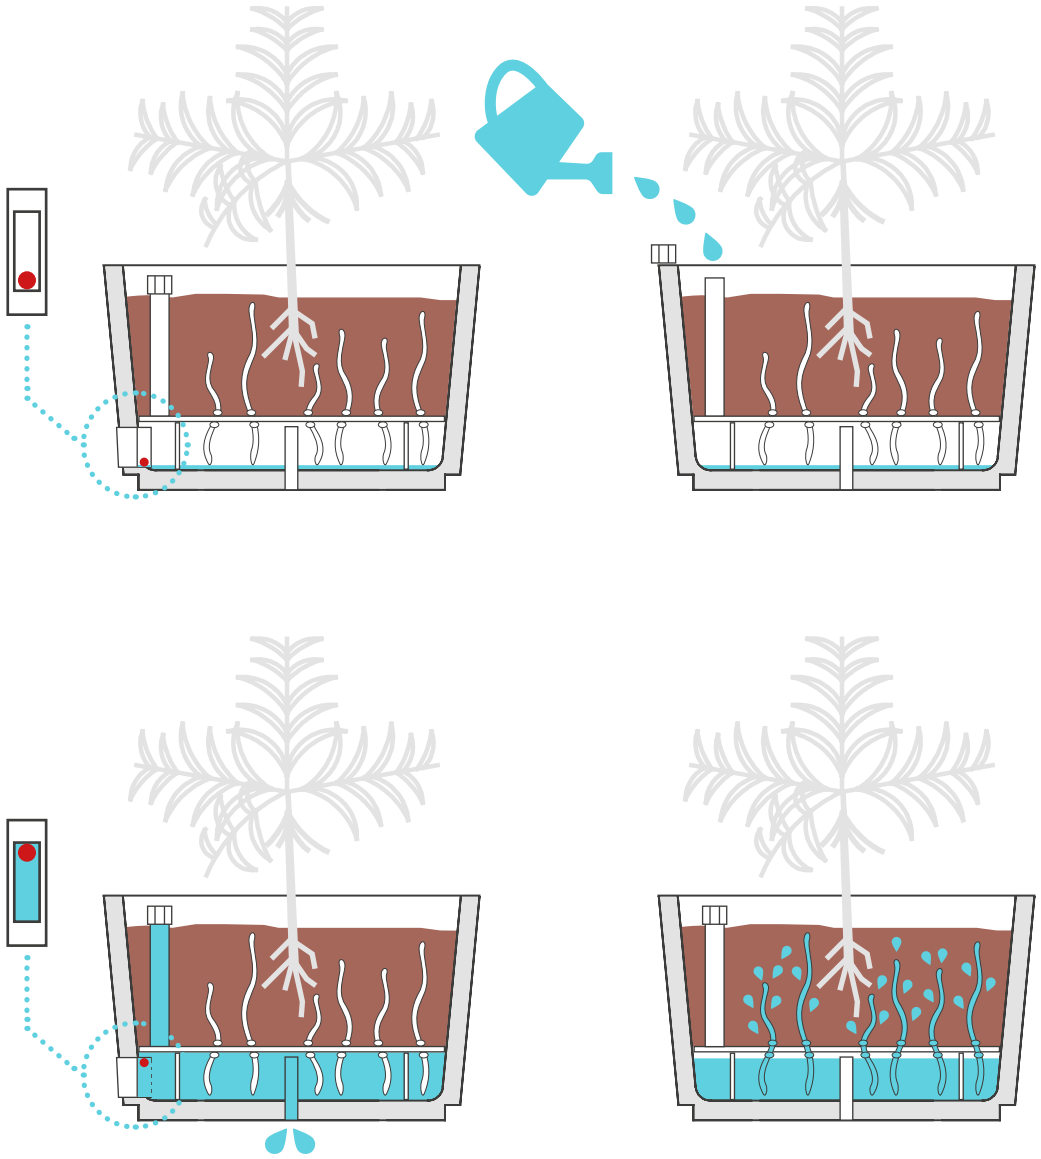

7 **Tubo de salida de agua sobrante y ventilación para evitar la putrefacción del agua estancada.**

Tub de sortida d'aigua residual i ventilació per evitar la putrefacció de l'aigua estancada.

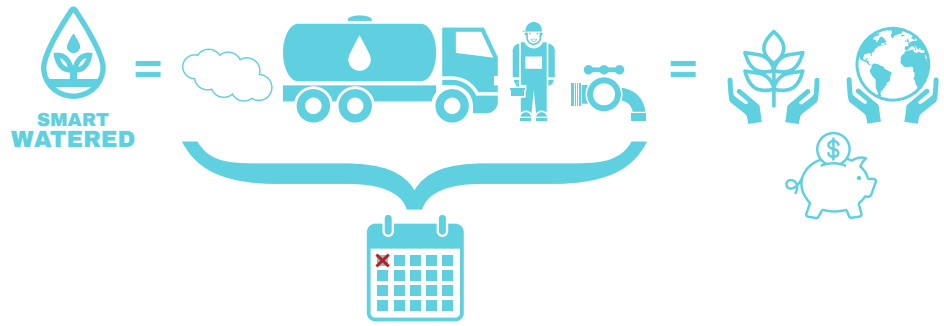

Outlet tube for remaining water and ventilation to avoid putrefaction of stagnant waters.

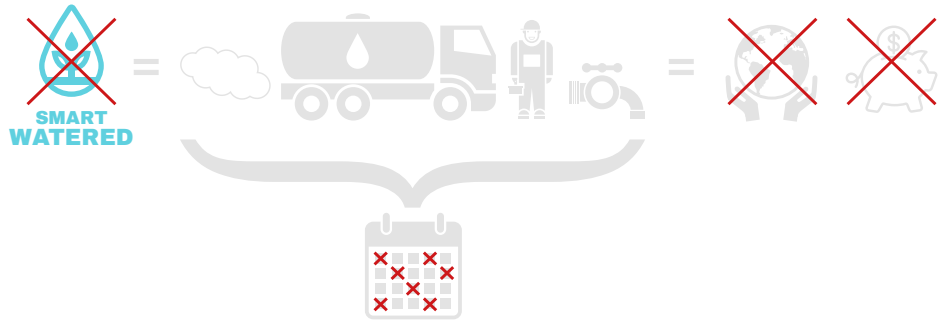

Tube de sortie d'eau restant et ventilation pour éviter la putréfaction de l'eau retenue.
