

LAPPSET MAINTENANCE PAINTS

updated 1.8.2019

MAINTENANCE FOR WOODEN PARTS

General principle is, that there will be chosen same type of paint as in original treatment.

Lappset delivers maintenance paint for wooden parts in 1 litre, but you are also able to purchase similar product from your local hardware store according to the closest RAL code.

Follow the instructions for painting conditions, given by paint manufacturer.

Preparations

1. Clean surfaces with brush.
2. Wash surfaces with paint remover.
3. Wash possible molded surfaces with hypochlorite solution for mould removal.
4. Rinse the surfaces carefully with clean water, from above downwards, e.g. with spray
5. Remove old paint.
6. Sand clean and dry surface (sandpaper 240-280) and remove sanding dust.

If you are not sure, which paint or treatment you should choose, please contact our customer service or your local Lappset representative.

PRODUCTS BASED ON FINNO, FITNESS. STREETWORKOUT AND SENIOR SPORT

* Please note, presented RAL codes are only references of the original shade used.

MAINTENANCE INSTRUCTIONS FOR PAINTED METAL PARTS

The original surface treatment used for the metal parts is polyester powder paint.

Description of maintenance paint: Surface treatment for metal. Car paints can be used as an alternative surface treatment.

Lappset delivers some maintenance paints for metal parts in 0,3 litre containers, but you are also able to purchase similar products from your local hardware store according to the closest RAL code.

Follow the instructions for painting conditions, given by paint manufacturer.

Maintenance paints for metal parts are intended to be used as touch-up paint for scratches and minor defects in surface. Paints are not intended for overspraying of large areas.

Preparations

1. Sand down the area to be painted with G240-320 sandpaper or sanding mat.
2. Clean the surface of any dust and oil.
3. Protect the parts that will not be painted.
4. Use a brush to paint smaller areas. For larger areas, you may use a paint spray, in which case remember to dilute the paint with water.
5. Allow to dry, the drying time is shown on the container.

If you are not sure, which paint or treatment you should choose, please contact our customer service or your local Lappset representative.

PLAY EQUIPMENT
